

Install CNS Color Printer - Apple

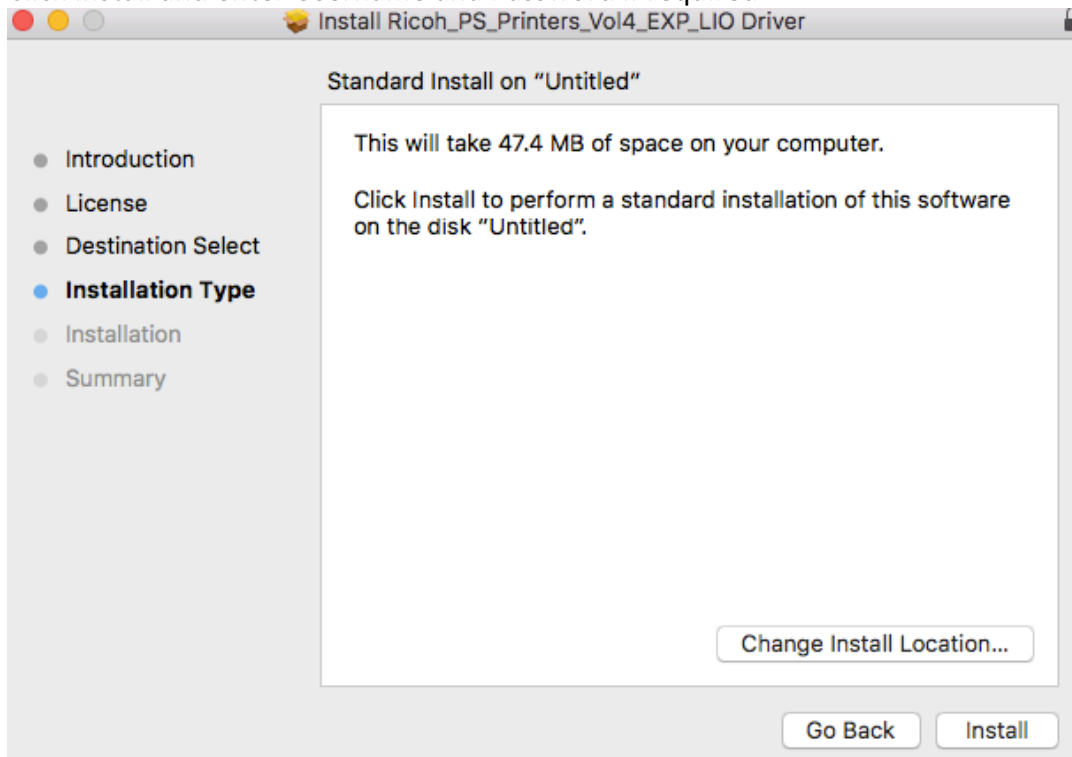

Download the installer from <https://ucdavis.box.com/s/3e3dtdx9bjzmmz43oruyahsq850pyzq>

Alternatively, you can download the driver from http://support.ricoh.com/bb/html/dr_ut_e/rc3/model/mpc307/mpc307.htm under PPD Installer

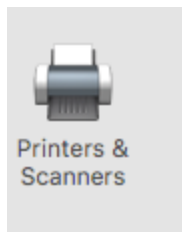

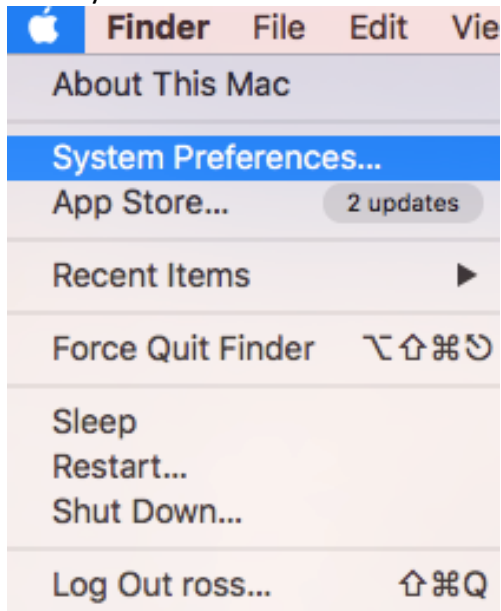

Launch the downloaded installer and then double click the Ricoh_PS_Printers package file to start the install process

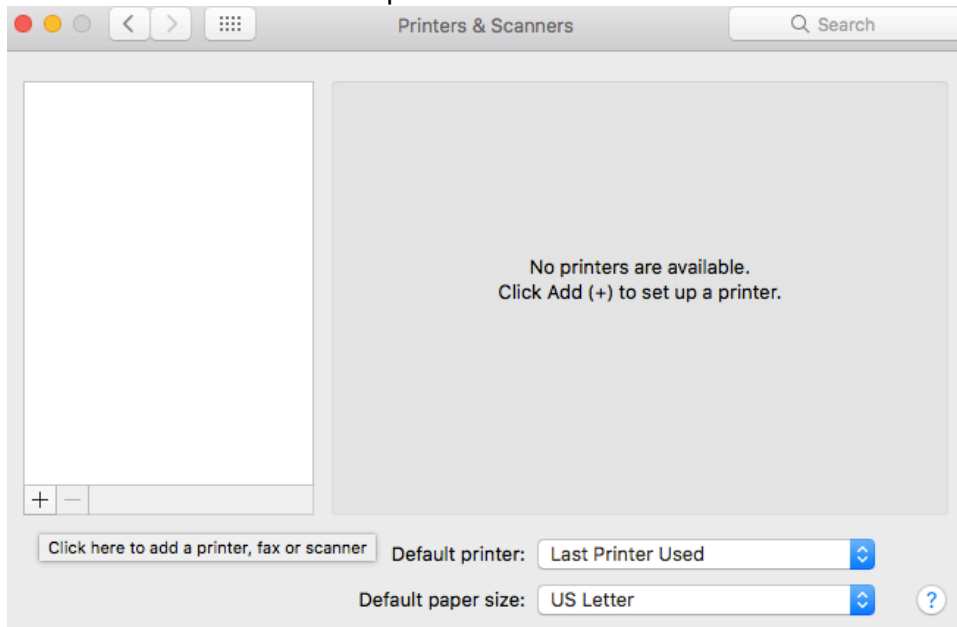

Click Install and enter Username and Password if required

Click System Preferences then Printers & Scanners

Click the + icon to add a new printer

Enter the details as the picture below and then choose Select Software from the Use drop down menu if Ricoh MP C307 PS is not an option.

Address: 128.120.140.142
Valid and complete host name or address.

Protocol: Line Printer Daemon - LPD

Queue:
Leave blank for default queue.

Name: CNS Color

Location:

Use: RICOH MP C307 PS

Add

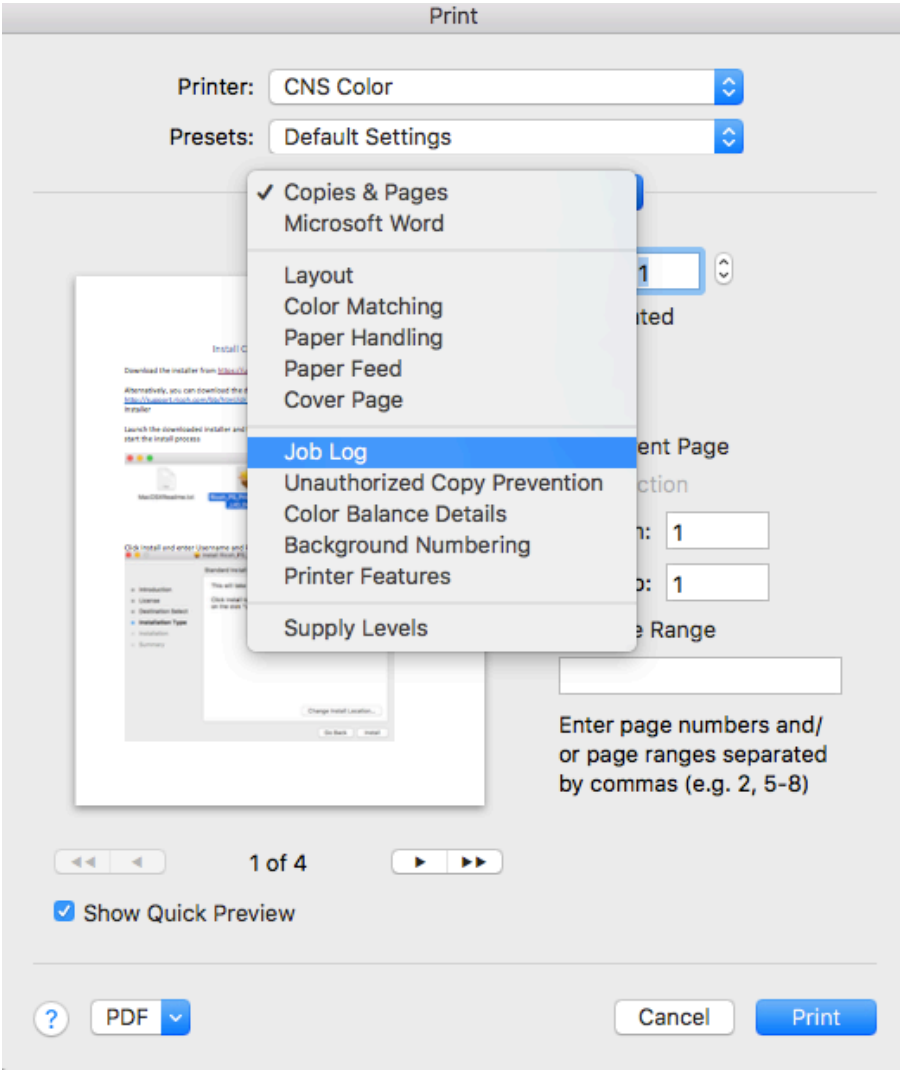

Type c307 into the search field and then select Ricoh MP C307 and press OK

mp c307

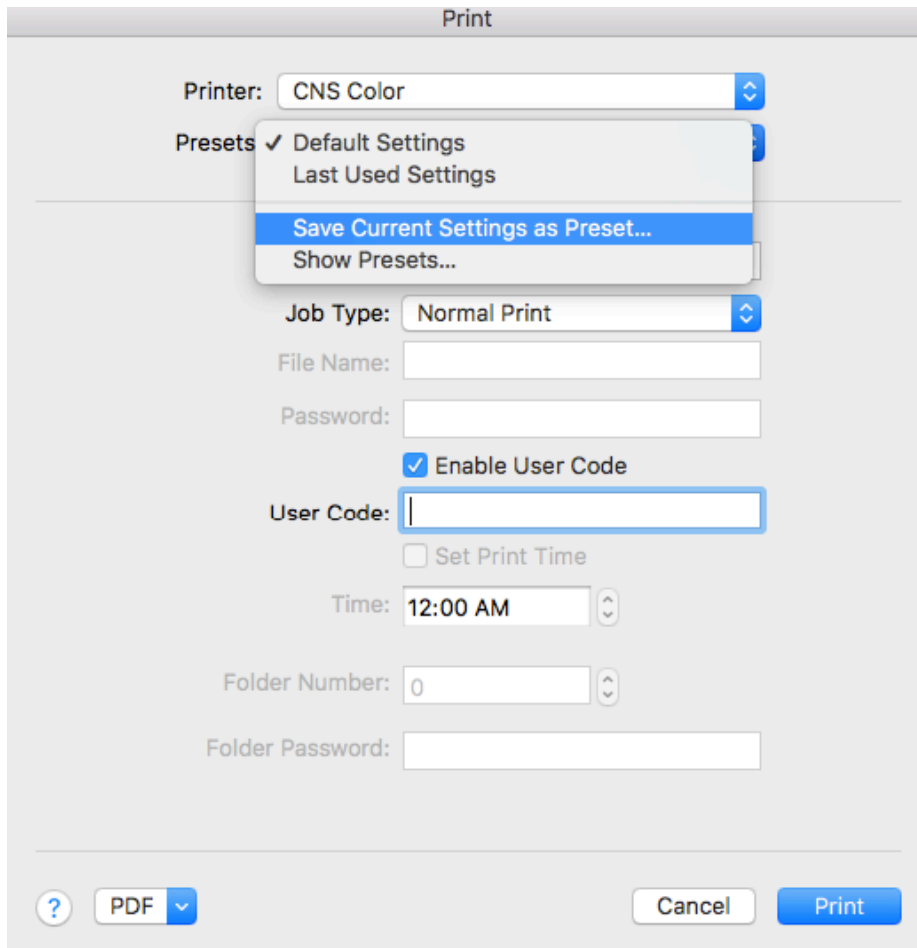

RICOH MP C307 PS

Cancel OK

Open Word or Notes and select Print. Find the drop down with Job Log and select it.

Check the Enable User Code box and enter your printer code. Select Save Current Settings as Preset

Give the Preset a name, select only this printer and press OK. Press Print again and you are finished setting up the printer.
